THE GAME

Xybots is a game for one or two players who take on the characters of the heroes Major Rock Hardy and Captain Ace Gunn. Your mission: to penetrate a vast underground complex and overcome the Master Xybot.

The huge subterranean city is composed of convoluted mazes with locked doors barring entry to different sectors and transporters to connect different areas.

Hordes of evil robotic monsters patrol the many corridors and you must battle with these Xybots to reach the exit elevator and so advance to the next level. In the mazes you will find energy pods, keys to open doors and coins to buy essential supplies like Enemy Mappers and more sophisticated weaponry. At the end of each level enter the store where supplies can be purchased – some of which are permanent while others are only temporary and must be replenished.

From the start you are equipped with a laser gun to blast the Xybots though extra cannons can be picked up on your travels. Your other weapon is a Zapper which stuns all enemies for a short time. You can buy extra Zap Power which allows you to inflict more serious damage.

Every few levels you must face the Master Xybot in a one-to-one-duel. Only by defeating him can you advance to the next level. The penalty for losing is to be sent back a few levels.
